

Illinois Renewable Energy is Facing a 2019 Funding Cliff

Vote yes on HB 2966 (Davis) / SB 1781 (Cunningham)

- Despite Future Energy Jobs Act (FEJA), funding for new renewable energy projects will be exhausted after 2019
- After adding thousands of jobs in 2018, **industry will lose jobs 2020-2024**
- Once FEJA funds have been fully deployed, Illinois will still meet less than 1/3 of our renewable energy requirement - IL will not reach 25% by 2025
- **Hundreds of renewable energy installations currently planned by communities, businesses, consumers and nonprofits will be unable to move forward**

The Cliff: Wind and Solar Development Stopped by Insufficient Funding

Path to 100 Act (HB 2966 / SB 1781) Gets Illinois Back on Track:

- Provides adequate funding to meet existing policy requirements
- Avoids boom and bust by establishing a stable policy for continued job growth
- Allows shovel-ready renewable energy projects to move forward
- Creates an estimated 21,000 new jobs, \$2.8 billion in new property taxes over 20 years, \$1.95 billion in landowner payments over 20 years
- Creates electric bills savings for community solar and distributed solar customers
- Expands successful programs encouraging a diverse & equitable workforce
- Supported by LiUNA and over 60 renewable energy businesses and organizations

HB 2966: Sponsored by Rep. Will Davis, Cosponsored by Reps. Jehan Gordon-Booth Joyce Mason, LaToya Greenwood, Justin Slaughter and André Thapedi

SB 1781: Sponsored by Sen. Bill Cunningham, Cosponsored by Sens. Ann Gillespie, Michael E. Hastings and Mattie Hunter
